

Testing Protocol:

Introduction:

- Join Zoom together
- Record Zoom meeting
- Introduce them to what they're going to be doing
- Make it clear that they need to talk about what they are thinking about the entire time

Website:

- Send files over to them and tell them to open index.html
- Ask user to find element corresponding to user stories
- Take notes on their thought process and record when they are confused
- Once element is found or they give up, go back to indexl.html
- Repeat 5 times for different elements corresponding to user stories

Ending:

- Ask about comments about the website and the overall design and user friendliness
- Takes notes on these comments
- Thank them for participating
- End the meeting and save the recording link
